The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status  1)⊠ Responsive to communication(s) filed on 23 J	January 2002				
· <u> </u>	is action is non-final.				
· <u> </u>		o proceedation as to the marite is			
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims					
4)⊠ Claim(s) <u>1-6</u> is/are pending in the application.					
4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>1-6</u> is/are rejected.					
7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/o	r election requirement.				
Application Papers					
9) The specification is objected to by the Examiner.					
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
11)☐ The proposed drawing correction filed on is: a)☐ approved b)☐ disapproved by the Examiner.					
If approved, corrected drawings are required in reply to this Office action.					
12) The oath or declaration is objected to by the Examiner.					
Priority under 35 U.S.C. §§ 119 and 120					
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).					
a) ☑ All b) ☐ Some * c) ☐ None of:					
1. Certified copies of the priority documents have been received.					
2. Certified copies of the priority documents have been received in Application No					
<ul> <li>3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).</li> <li>* See the attached detailed Office action for a list of the certified copies not received.</li> </ul>					
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).					
a) ☐ The translation of the foreign language provisional application has been received.  15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

# Claim Rejections - 35 USC § 112

Page 2

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 recites the limitation "said coupling" in line 2. There is insufficient antecedent

basis for this limitation in the claim.

3. Claim 6 provides for the use of the non-tension steel wire, but, since the claim does not

set forth any steps involved in the method/process, it is unclear what method/process applicant is

intending to encompass. A claim is indefinite where it merely recites a use without any active,

positive steps delimiting how this use is actually practiced.

Claim 6 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd.* v. *Brenner*, 255 F.

Supp. 131, 149 USPQ 475 (D.D.C. 1966).

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Crowley (2859504).

Application/Control Number: 09/831,337

Art Unit: 3637

Page 3

Crowley (figures 1-2) shows a tension force adjustable prestressed girder (10) for adjusting a load-resisting force which consists of an upper flange (10), supporting an upper deck of bridge or building installed thereon (col 1 lines 50-55), a body portion (the middle of the Ibeam), a lower flange, the prestressed girder having tension steel wires (15, 16) provided in a lengthwise direction of the girder and tensioned to compensate the load-resisting force, at least one or more non-tension steel wires (40, 43, 44, 45, 46, before being stressed) provided in the lengthwise direction of the girder, a cut-open portion (38) at a predetermined portion in the lengthwise direction of the girder and a coupling member (24) installed at the cut-open portion (38) for fixing one ends of the steel wires of which the other ends are fixed at an end portion of the girder, one end (46) of the non-tensioned steel wire is exposed at either end portions of the girder to apply a tension force.

#### Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Crowley (2859504) in view of Huang et al (5535562).

Crowley shows all the claimed limitations except for the coupling member having a support member having holes formed therein through which one ends of the steel wires penetrate, wedges inserted between the steel wire and the support member.

Huang et al shows a coupling member having a support member (50) having holes formed therein through which one ends of the steel wires penetrate, wedges inserted between the steel wire and the support member.

It would have been obvious to one having ordinary skill in the art at the time of the invention to modify Crowley to show the coupling member having a support member having holes formed therein through which one ends of the steel wires penetrate, wedges inserted between the steel wire and the support member a taught by Huang et al because it would enable easy tensioning of the steel wire.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Crowley.

Crowley shows all the claimed limitations except for the tension force of the non-tension steel wires being adjusted while the bridge or building is being used.

It would have been obvious to one having ordinary skill in the art at the time of the invention to show the tension force of the non-tension steel wires being adjusted while the bridge or building is being used because it strengthens the girder against fatigue and aging.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows different prestressed structures.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phi D A whose telephone number is 703-306-9136. The examiner can normally be reached on Monday-Thursday.

Application/Control Number: 09/831,337
